

Class 11: Iterating Over Positions

Held: Monday, 17 September 2007

Summary: We consider a simple approach to working with images - looping over the pixels in an image and computing a new color based primarily on positional information. We then explore some applications of this approach.

Notes:

- Are there questions on Homework 6?
- Reminder: Take-home exam 1 will be distributed on Friday and due the following Friday.
- Advance notice: EC for Tony Leguia's talk Thursday at 4:15 in 3821.
- Assigned groups for the next few weeks.

Overview:

- Iteration, a key aspect of algorithm design.
- Iterating over positions.
- Blends and other positionally-computed images.
- Simulating `image.map!`.
