

## Class 42: Evaluation and Wrapup

**Held:** Friday, May 11, 2007

**Summary:** Today we conclude the class.

### Related Pages:

- EBoard.

### Notes:

- Don't forget the picnic today!
- I'll distribute project grades after class.

### Overview:

- About the final.
- Wrapup.
- Evaluation forms.

## Wrapup

- Designed as a different kind of CS course
- Intended morals of the course:
  - You can read the primary literature (and it may be worth doing so)
  - Different languages/paradigms help you think differently
  - Understanding CS requires understanding Math
  - Take everything with a grain of salt
  - Grading is less important than doing
- I've enjoyed teaching this course. I hope you've enjoyed learning from it.

## Evaluation forms

- Fill it out.
- Deliver it to the science office.
- Leave.
- Work on the final and send questions.
