

Class 09: Input and Output, Continued²

Held: Friday, 10 September 2010

Summary: We continue to continue our exploration of C's primary input and output routines.

Related Pages:

- EBoard.
- Lab: Input and Output.

Notes:

- I expect that we'll *finally* get to the command line on Monday.
- Assignment 3 is now ready.
- It appears that some of you learned the disadvantages of waiting until the last minute to do homework. (Of course, the easy availability of solutions online helped.)

Overview:

- Preliminary Reflections.
- Lab.

Reflections from Problems One and Two

- We tend to use only `int`, `long`, and `double`.
- Use "`%lf`" as the pattern when you want to read doubles.

Lab

- Continue to work on the lab.
 - Be prepared to reflect.
