

Class 22: Discussion of Exam 1

Held: Monday, 4 October 2010

Related Pages:

- EBoard.

Notes:

- I have not yet finished grading exam 1. I'm trying, though.
- Not very many of you responded to the reading. Grrr. Fortunately, you have another chance for tomorrow.

Overview:

- General Exam Issues.
- This Course's Approach.
- Specific Problems.

Some General Issues

- Formatting. Bleh!
- Not a lot of testing (or at least not a lot shown), so you didn't know when things were wrong.
- Ugly, repetitious code.
- But some clever approaches.

The Course's Approach

- We've been doing stuff a bit differently than normal.
- Rather than teaching you about each piece in turn, we started with a big overview and assumed that you got it.
- How is this strategy working?

The Problems

- We'll go over as many as we can.
 - Check my solutions and let me know if you have questions.
