

Class 27: Debugging with DDD

Held: Tuesday, 12 October 2010

Summary: We consider the process of debugging.

Related Pages:

- EBoard.
- Lab: Debugging with DDD.
- Reading: Debugging with DDD: Summary and Sample Session.

Notes:

- Reading for tomorrow: Chapters 1 and 2 of *Managing Projects with GNU Make*.
- Can you guess what I'm going to say about reading responses?
- Are there questions about assignment 5?

Overview:

- Your Questions.
- Lab.

Your Questions

- What exactly is an inferior debugger?
- Is there any way to put the -g option in a Makefile and compile it using that?
- I was wondering if there are any development environments where we can just chill in there.
- I'm confused by this whole "a" business in the sample session section.

Lab

- Do the lab.
 - Be prepared to share your feelings about the key debugger capabilities.
-
