CSC161 2011S *Imperative Problem Solving*

Class 48: Linked Lists (5)

Held: Friday, 29 April 2011

Summary: We conclude our exploration of lists in a lab.

Related Pages:

- EBoard.
- Lab: Lists, Revisited.
- Reading: Lists (`Examples/list.h`, `Examples/list.c`).

Notes:

- Reading for Monday: K&R 6.5-6.6.
- New name for Week 14: X-Week.
- I've posted answers to your questions on the list code.
- Readings missing from: AA, AG, JTL, SR, BZ.
- The experts: CA, JC, RC, DF, BW.
- Submit questions on Exam 3 via Piazza.
- I am booked for office hours today, but should be beack to a normal schedule next week.
- Signup CS Picnic, Friday, 6 May 2011.
- Today's code in `Examples/Lists`.
- EC for CS Table Friday (Bitcoin). [academic]
- EC for GIT Presentation of Benji's play, Friday, 7:30 in Main. [peer]
- EC for Psychologist Candidate Talks, coming soon. [academic]
- *Email me any other EC opportunities.*

Overview:

- Implementing `list_cut`.
- Lab.

Lab

Preparation

- Review .h file
- Review implementation of `list_get` (provided) and `list_index_of` (done in class)

Setting Elements

- Write some simple tests for `list_set`.
- Write some simple experiments for `list_set`.
- Implement `list_set`.

Inserting Elements

- Write some simple tests for `list_insert`.
- Write some simple experiments for `list_insert`.
- Implement `list_insert`.

Deleting Elements

- Write some simple tests for `list_delete`.
- Write some simple experiments for `list_delete`.
- Implement `list_delete`.
