

CSC295 2014S, Class 03: The Bash Shell - A Refresher

Overview

- Preliminaries.
 - Admin.
 - Reviewing homework 2.
 - Questions.
- Some things you should know about *nix.

Preliminaries

Admin

- I encourage you to attend CS table on Friday and talk about P vs. NP.
- Homework:
 - Part 1: Write a program that cleans up after `script`. Put it in the repo. (I'd recommend using C, but it's up to you.)
 - I'm sure you can find one. You learn more by writing it.
 - Part 2: Write a bash script that finds all of the files under the current directory that end with `.jpg` and moves them to a directory called `images`. Put it in the repo.
 - Part 3: Try to teach yourself `vi` or `vim` and add to the list of questions you'd like answered or tasks you'd like to learn how to solve.
 - Part 4: Learn enough Markdown that you can write useful answers.

Reviewing homework 2

Questions

Some things you should know

Files and directories

Command-line patterns

File and directory permissions

I/O redirection

Variables

Command-line history

The `script` command

- Files and directories.
- Command-line patterns.
- File and directory permissions.
- I/O redirection.
- Variables.
- Command-line history.
- The `script` command.
