Web Exploration, Revisited

- Some of you were having trouble with the Web exploration.
- For those who don't have the patience to come up with ten homologs, here are some sequences our authors suggest as interesting. (Note that you can get to each at <http://www.ncbi.nlm.nih.gov/protein/IDENTIFIER>) Note also that some have become deprecated (superceded?) in the past two years.

- The Pasteur version of Phylip seems to be working.

<http://bioweb.pasteur.fr/phylogeny/intro-en.html>.

- In order to use Phylip, you need to run ClustalW first. You can find the results in `recq.clustalw`.
- We can run those through ClustalW2
- WE can also run them through Phylip Protpars
