

Class 10: Prolog (3)

Held: Monday, 14 February 2011

Summary: We conclude our exploration of Prolog by looking at some puzzle solvers.

Overview:

- Thinking in Prolog.
- Lab.

Thinking in Prolog

- Two approaches.
- "Pure" Prolog: "A predicate that holds when"
- More intentional prolog: "A predicate that, given X , generates Y ."
- We'll play with `length`.

Lab

- Do the lab.
- Be prepared to reflect.
